

Enterprise Value Assessment Workshop

Define A Successful Technology Deployment, Create Transparent Governance & Optimise ROI

Enterprise Value Assessment (EVA) Workshop

The **Project Design Phase** is a key component of any technology project, defining the terms of a valuable delivery for each organisation and creating the blueprint for the project steps and goals. QUANTIQ's EVA facilitators help decision-makers establish their primary project goals above and beyond simply enhancing efficiency, empowering your organisation to derive long-lasting value from your deployment. Organisations will finish the EVA assessment with a clear, defined roadmap to achieve their goals and enhance their businesses with [Microsoft Dynamics 365](#) and [Power Platform tools](#).

What to Expect During Your Enterprise Value Assessment Workshop Process:

- Key business stakeholder alignment on desired organisation outcomes, determined by exploring the WHYS.
- QUANTIQ-led interviews to understand your organisation, identifying challenges, opportunities for improvement and proposed solutions.
- Key metrics for improvement identified, baseline numbers captured and potential improvements mapped out.
- Create a "Business Case for Change" plan, with cost and benefit details captured and documented as an executive readout.

What Are The Goals for Your Enterprise Value Workshop

Expected Outcome:

- Identification of your organisation's objectives, challenges, and opportunities for improvement
- Quantification of identified metrics
- Agreement on financial improvement levers
- Plan with agreed-upon next steps

Execution Report Output:

- 1 Discovery Findings
- 2 Enterprise Value Framework
- 3 Benefits Summary
- 4 Proposed Solutions Overview
- 5 Investment Details

Why Consider an Enterprise Value Assessment (EVA) Workshop

The EVA Workshop is recommended for leadership teams who are looking to define, in detail, the value drivers and metrics of their IT modernisation. This workshop empowers teams to build on their IT strategy, determining an appropriate governance and review structure with clear ownership, and ensuring seamless stakeholder engagement.

The EVA Workshop is a **customised workshop experience** and content will be delivered with reference to the specifics of an individual organisation. Some preparation time is therefore required between event booking and delivery. 100% funding is available from Microsoft for qualifying organisations, and QUANTIQ will manage the application and approval process on behalf of clients. Funding decisions are normally confirmed within 5 working days.

Alternatively, organisations can self-fund the cost of the EVA Workshop, which can be delivered with costs ranging from **£5,000 to £10,000** depending on the number of delegates and stakeholder interviews to be concluded.
